Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair! Please don't raise the fee for our services. I am disabled and currently can not afford to have a phone in my home. I been a long time user of tracphon and they saved me more then once with there services they provide. Please look out for us less fortunate and deorived keep our current rates. Let the big companies pay more then us little people that are just trying to get from day to day. It dosen't seem fair that the poor get pooer and the rich stay richer. These huge companies can afford these new raises, but us less fortunate allways end up paying for it. Please think of all the people that rely on tracphone because of there affordable rates. Please leave us alone and let us live with the little thing's we have.

Sincerely, J.A.Velazquez

Sincerely,

Jose A. Velazquez
